Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 10, 11, 16 and 19, drawn to a glyphosate tolerant cottonseed or plant.

Group II, claim(s) 7 and 8, drawn to an isolated DNA polynucleotide primer molecule.

Group III, claim(s) 9 and 12-15, drawn to A DNA detection kit that detects cotton event MON 88913 and methods of using.

Group IV, claim(s) 17 and 18, drawn to a method of determining the zygoty of the progeny of cotton event MON 88913.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Glyphosate tolerant cotton plants were known in the art at the time of the instant invention, hence the claims lack the same special technical features and thus do not relate to a single general inventive concept.

3. Applicant is advised that the reply to this requirement to be complete within one month (not less than 30 days) must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1638

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
